Infosec University

- It is a website developed for who wants to learn more about security in the technology field.
- Our goal is to teach people about security topics , so they will learn how to exploit problems and they will be able to prevent their own systems from those hacks

Tutorials

Challenges

News

Differentials

- A well planned design
- Proper content organization
- Accessibility

Architecture

- Sails
- MVC
- NoSQL

Challenges

- Learn new technologies
- Coordinate the work and meetings with a big group
