

Friday February 27th Scrum Meeting

Location: Bahen Centre

Time: 6PM - 11PM

In Attendance:

- Caroline Caetano
- David Chen
- Shudman Chowdhury
- Lucas Lima
- Antonio Raposo
- Eric Scott
- Haris Shoaib

Topics Discussed:

- Progress
 - Eric has completed initial work on the user system, currently handling special cases for login/signup system
 - Caroline and Antonio have setup the category system using SQL Injection as the starting point, currently finalizing how the view will display the categories
 - Shudman and Haris have setup the tutorial system using Error Based SQL Injection as well as Time Delay SQL Injection as the starting point
 - David, Alexei, and Lucas have completed initial work for setting up exercises, currently generating exercises for the tutorials being used for first release

Action Items:

By Wednesday March 4th,

- Each team member will finalize the remaining work to be completed for their assigned components so code review can be performed
- Any remaining issues seen in a team member's assigned component should be documented using Github's issue management system to keep track of these issues, as well as provide other team member's information to use for code review
